

## MAKING AN ENTRANCE... SMART

Speedgate Xentry with Xense offers you carefree use

### A SPEED GATE THAT YOU CAN TRUST

Safe and comfortable living requires safe and comfortable access to parking. With a Xentry Speedgate you are guaranteed an access that delivers the highest quality, safety and comfort. With a Xense service package you can benefit from years of trouble-free use and greater convenience. This means:

- a five-year warranty on a new Speedgate
- trouble-free use through 24/7 on-line monitoring and proactive support
- lower maintenance costs and greater reliability through predictive maintenance

### XENSE: 24/7 ASSURANCE & CONVENIENCE

Xense connects your Speedgate to the internet and ensures that you and your service partners (manager of the resident's association, Speedgate supplier) gain real-time insight into the performance of your Speedgate. This provides a host of opportunities to increase reliability and ease of use and to reduce maintenance and management costs.

You know immediately when your Speedgate is acting erratically; for example, if it stays open or is malfunctioning. Faults are avoided as much as possible by predicting when components are likely to breakdown and replacing them early.

Effective intervention in the event of a malfunction or collision because the diagnosis can be made in advance and the service partner can bring the right parts and immediately replace them.

By preventing malfunctions, you avoid worry, corrective maintenance and therefore a lot of extra cost. That is assuring and cost-effective.

Xense allows your Speedgate to be easily coupled with modern access control systems.

## SERVICE BY HTC, SECURITY AND TROUBLE-FREE USE

A Speedgate should be maintained annually. In this way, we can guarantee a trouble-free and safe use. HTC service provides real assurance with regards to safety, not only checking safety devices and systems visually at each scheduled maintenance, but also by employing specific test equipment. We present this information together with information on usage and performance in an annual report. This forms the basis for any change or improvement in access.

## A SERVICE PACKAGE FOR EVERY PURPOSE

HTC Service offers three service packages tailored to different types of operation and maintenance purposes.

- With **smart & safe service** you are demonstrably assured of an optimal and safe Speedgate at a very competitive price.
- With an **Xense** package you are assured of trouble-free operation and more effective maintenance. This is, among other things, reflected in a 5 year warranty on a new gate.
- **Xense premium** makes crystal clear what happened to a Speedgate by Video Incident registration and provides you with predictable service costs in normal use.

Request a no obligation quote and terms of service for your particular circumstances.
